

You're invited to LEGO® Club!

Based on the principles of LEGO-based therapy, LEGO club uses LEGO to support the development of social skills. Participants will be grouped into teams and will work together to complete a project. Each child will have the opportunity to negotiate, share, problem solve and collaborate, amongst other skills.

The benefits of LEGO® Club are:

- Uses lego as a medium to communicate and build relationships,
- Promotes social interaction,
- Promotes collaborative play in a structured environment,
- Children practice joint attention, social communication, working towards a shared goal, turn taking and negotiation skills.

Who is this group for?

Children aged 8-11 years who can:

- Sit in a chair at a table,
- Not wander off,
- Maintain listening skills,
- Enjoy and are interested in LEGO.
