

HELP TEST AN ASSESSMENT OF FUNCTIONING FOR SCHOOL-AGED CHILDREN ON THE AUTISM SPECTRUM

Curtin University

AUTISM RESEARCH
GROUP (CARG)

We are testing a parent-report assessment of functioning tool for children aged 6-16 years who are on the autism spectrum.

Who can participate?

- Parents / caregivers of a child on the autism spectrum aged 6-16 years;
- Who live in Australia; and
- Can read and understand written English language.

What am I being asked to do?

Taking part in this study will involve completing two online surveys, about two weeks apart. The surveys will take 30-45 minutes to do.

By participating in this research, you will be helping us to find out if the tool is a reliable measure of functioning for children on the autism spectrum.

A gift voucher will be provided as a thank you for participating in the research.
